

Title: Pak – China OFC Project

- a. Contents:** Scope of the Project, Design of The entire Layout, Technical Discussion.
- b. Objectives:** Pak – China Optical Fiber Cable (OFC) is being executed under the ambit of China – Pakistan Economic Corridor (CPEC) for laying 820 Km of OFC from Rwp to Khanjerab (Pak – China Border) for 1st ever direct interconnectivity between the two neighbouring countries. The challenging project being implemented through highest mountain ranges in the world has broad strategic, technological and socio economic dimensions. The project on OFC part is in final stages of completion and expectedly it will be completed by the end of current year(2017). The project has a major role to play on provision of broad array ICT services along CPEC routes for the other mega infrastructural projects of CPEC. The project with its current and future dimensions is a game changer for transforming Trade Corridor into Digital Corridor.
 - c. Instructor:** Engr. Waseem Ahmad is Director Pak China OFC Project. He is graduate of UET Lahore for his BE (Telecom Engineering). He is holds a Master degree in Telecommunication from NUST. He has also vast experience of teaching.
